

initialization by an object which is customized for the configuration, the definition and creation of a proxy conveniently being done together with the registration of the object it is representing.

50. Arrangement as claimed in claim 49, characterized in that only the grouping of objects into clusters, capsules and nodes is performed, all objects, clusters, capsules and nodes being considered as if they are all located within the same domain, the application designer adding thereto specific programming code and executing the linking and compilation.

51. Arrangement as claimed in claim 27, characterized in that there is introduced a new redirection function on the DPE in question, as well as the possibility of generating special stub for any dynamic objects.

REMARKS

By the foregoing amendment, Applicant have cancelled claims 1-26 of the originally filed application and substituted therefore new claims 27-51 corresponding to the amended claims of the corresponding PCT application.

Prompt and favorable examination on the merits is respectfully requested.

Respectfully submitted,

NIXON & VANDERHYE P.C.
